#### Methane Emissions Avoided Through Infrastructure Upgrades

#### Algonquin's projected generation capacity growth (MW)

Review our [2021 ESG Report](#) to see how we're contributing to the United Nation's Sustainable Development Goals.

<sup>1</sup> Calculation includes preliminary base-year emissions estimates for ESSAL (Chile) and Ascendant (Bermuda), each acquired in 2020. These annualized estimates are based on actual emissions data for these entities during the 2020 post-acquisition period. Formal base-year recalculations for ESSAL and Ascendant are expected to be performed in connection with Algonquin's 2021 calendar year ESG disclosure.

### ESG Rating Agency Performance (as of August 31, 2021)

#### Footnotes:

- All scores as of August 31, 2021.
- Peer averages: MSCI – Utilities; Sustainalytics – Multi-Utilities; CDP – Renewable Power Generation; S&P CSA – Multi and Water Utilities; S&P Global – Universe; Bloomberg – Universe.
- Customer connections, generation capacity, greenhouse gas emissions, energy intensity ratios, water usage, number of employees, and legal actions for anti-competitive practices include Algonquin's 2020 acquisitions (ESSAL and Ascendant) on a pro-rated basis. The remaining categories do not include ESSAL and Ascendant.
- MW generation capacity determined by gross nameplate capacity of generation assets owned and managed by Algonquin (operational control).
- 2020 GHG reductions largely due to retirement of Algonquin's sole coal-fired generation facility in March 2020.
- Calculation includes preliminary base-year emissions estimates for ESSAL (Chile) and Ascendant (Bermuda), each acquired in 2020. These annualized estimates are based on actual emissions data for these entities during the 2020 post-acquisition period. Formal base-year recalculations for ESSAL and Ascendant are expected to be performed in connection with Algonquin's 2021 calendar year ESG disclosure.
- 2019 water and effluent data has been removed due to methodology improvements in 2020. 2020 data appropriately reflects Algonquin's baseline water activity.
- "Leadership roles" refers to employees in the following job levels: executive, senior vice president, vice president, president, senior director, director, and senior manager.
- Health and safety metrics are for Algonquin employees. Contractor-related metrics can be found in Algonquin's 2020 ESG Performance Index.
- System Average Interruption Duration Index is measured in minutes.
- System Average Interruption Frequency Index is measured as a rate.
- The National Economic Prosecutor's Office in Chile opened an investigation into unregulated businesses operated by any Chilean water utility, examining whether there has been any price manipulation. This matter is still under investigation.
